

# FASTdocs v7.0

## Enterprise Content and Information Management *Revolutionized.*

### A WHOLE NEW ARCHITECTURE. WEB-BASED, BROWSER & OS AGNOSTIC

We're revolutionizing enterprise content and information management with FASTdocs v7.0. Our flagship ECM / EIM platform for banks and credit unions ensures data is more streamlined and easily accessible across the institution - faster than ever before.

With a new architecture and reduced 'clicks' for a more intuitive user journey, FASTdocs 7.0 is a web client application. Access information from anywhere and quickly search customers and members, accounts, collateral, departments, and more - from the convenience of any browser.

### POWER YOUR DIGITAL ECOSYSTEM & INFORMATION STRATEGY

Although we've transformed the platform to ensure the most modern and streamlined user experience, a few things remain - like automatic data recognition, proven workflows and intelligent automation, and 24x7x365 permission-based self-service capabilities for employees and account holders, alike.

Power your global digital repository with the document trees and quick views that make finding information fast, and benefit from an improved task workflow that allows you to navigate with person- or account holder-centric views. Scan, print, export, redact, annotate and more, right from the browser.

### INTUITIVE TO USE. EASY TO DEPLOY

Getting started on the newest release of FASTdocs is quicker than ever, especially if you're a current user - there are no migrations or database conversions required to move from v6.X to v7.0. Deploy FASTdocs from a hosted environment within the secure Alogent Cloud, or a server on-premise in your own environment.

*Flexibility, simplicity, and convenience are what FASTdocs 7.0 is all about.*

### FASTdocs. EIM REVOLUTIONIZED

- Web-client application, with a browser and operating system agnostic approach: Windows or Mac, Chrome, Edge, Firefox, Safari and any combination.
- An overhauled user experience with sleek displays, thumbnail previews, and intuitive views.
- Reduced 'clicks' and new side-by-side panels that make finding information lightning-fast.
- A new "My Recent Documents" view to quickly resume your last session.
