Unify: 1 Open Platform, 1 API, 1 UX

Modernize Your Payments Ecosystem with a Cloud-Based, Open Banking Approach

Move your payment solutions to the cloud with Unify and benefit from its patent-pending open platform and single API approach. Meet goals effortlessly across all business units, the back office, and executive teams with a consolidated, device-agnostic offering for all channels. Gain tighter integrations, a consistent UX, and quick access to data analytics, reporting, and visualizations for smarter decisions.

COST-SAVINGS BENEFITS & IMPROVED EFFICIENCIES

By treating every document and check the same regardless of how it is captured, Unify simplifies image acquisition for banks and credit unions and eliminates the need for batch processing, as well as the requirement to exchange files between applications.

- Open platform powered by a single API.
- Common set of code and centralized, easily configurable framework.
- Tight integrations to third-parties.
- Single UI/UX and user journey cross-channel.
- Quick access to data, including image archives, reporting and visualizations.
- Reduced costs and faster times-to-market for new products and services.

VERSATILITY & SCALABILITY FOR EVERY INSTITUTION

Built on the proven innovation of Alogent's Advanced Interactive Capture (AIC), Unify incorporates the same leading and highly scalable capture technology that Alogent has excelled at for both mobile and branch environments around the world.

Scalable to support the needs of the smallest banks and credit unions, as well as the largest Tier 1 banks, Unify also flexes to address the unique considerations of international institutions. Configurable and customizable, Unify enables both common and customized business rules so institutions can meet unique requirements.

SINGLE PLATFORM BENEFITS

Ensure engaging with customers and members is simple and intuitive with consistent user experiences regardless of where images are captured: mobile, online, ATM, teller line, or any other channel. Institutions also benefit and need only to maintain one environment, the same code-set, and a single API across the enterprise, making updates, maintenance and launching new products fast.

REPORTING & CLEAR VISIBILITY

With Unify, all channels access one database and one reporting dashboard, delivering a clear view into every point-of-presentment, along with the status' of the items downstream in a single view.

Gain additional levels of insight and visualizations with a seamless integration to AWARE, Alogent's enterprise analytics and reporting platform. Quickly see fraud stats, deposit volumes by channel, user journeys, and more - all in customizable, role-based views.
