

# Solution Innovation for Credit Unions: Proven to Drive Member Engagement and Boost Institutional Loyalty

Alogent's advanced technologies are proven to digitize and automate the workflows and transaction ecosystems at credit unions of all sizes. As an industry leader for more than 20 years, Alogent's solution suites leverage the latest in AI, machine learning and predictive analytics, including enterprise-wide data intelligence and reporting solutions, to enable institutions to deliver products and services that boost engagement through personalization and data-backed decisions.

## HIGH-YIELD SOLUTIONS FORGED WITH USER-CENTRIC PHILOSOPHY

Built with open architectures and API-backed flexibility, Alogent's platforms allow for tight integrations to third-parties and core banking systems. Meet goals effortlessly today and ensure scalability for tomorrow.

Transformative on their own, Alogent's solutions come together to create a holistic, fully integrated digital ecosystem that offers consistent user experiences regardless of the point-of-presentment or device used, driving member loyalty, expanded business opportunities, access to cross-channel data, and a tangible ROI.

## EMPOWER LIMITLESS GROWTH

Alogent's capabilities are designed to scale, and are available as on-premise or hosted offerings. These flexible deployment options allow credit unions to focus on their strengths and to best serve their members.

## A COMMITMENT TO COMMUNITY INSTITUTIONS AND INNOVATION

Alogent is committed to ensuring community institutions remain competitive and innovative, and believe a strong partnership is key to our clients' successes. Whether your focus is on account growth, efficiency, cost reduction, service levels or operational resilience, Alogent is the answer to meet your strategic goals.

### ROBUST & SCALABLE PLATFORMS THAT DRIVE MEMBER ENGAGEMENT

**Digital Banking:** NXT is a unified online, mobile and digital banking platform with integrated capabilities for consumers and businesses. Flexible, open, and API-based, NXT includes pre-built configurations, robust out-of-the-box capabilities, and is paired with an SDK for limitless customization.

**End-to-End Check Payment Processing:** Address all full- and self-service channels, in-branch and remote, including Day 1 and Day 2 processing. Our patent-pending platform, Unify, offers an open banking approach and allows you to power all deposit channels with a single API and common set of code.

**Enterprise Content and Information Management (ECM / EIM):** FASTdocs is a web-based application suite that offers ultimate flexibility with a device, browser, and OS agnostic approach. Reduce manual processes, streamline workflows, and enable fast access to data.

**SMB Solutions:** Offer add-on capabilities to your mobile banking solution for e-invoicing and payments collections at the point of sale.

**Fraud Detection:** Real-time fraud detection at the point-of-presentment.

**Analytics and Reporting:** Gain enterprise-wide data analytics, reporting and visualizations in centralized hub with role and persona-based access.
